Personnel and Readiness

## FOREWORD

This Manual is issued under the authority of DoD Instruction 1325.07, "Administration of Military Correctional Facilities and Clemency and Parole Authority," March 11, 2013, and prescribes procedures for computing sentences to confinement for prisoners in military correctional facilities.

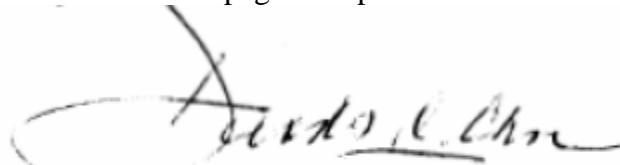

This Manual applies to the Office of the Secretary of Defense, the Military Departments, the Chairman of the Joint Chiefs of Staff; the Combatant Commands, the Office of Inspector General of the Department of Defense, the Defense Agencies, the DoD Field Activities, and all other organizational entities within the Department of Defense (hereinafter referred to collectively as "the DoD Components").

This Manual is effective July 27, 2004 and is mandatory for use by all DoD Components.

Send recommended changes to this Manual to the following address:

Office of the Under Secretary of Defense  
(Personnel and Readiness)  
Program Integration-Legal Policy  
4000 Defense Pentagon  
Washington, DC 20301-4000

The DoD Components, other Federal Agencies, and the public may download this Manual from the Washington Headquarters Services web page at <http://www.esd.whs.mil/DD>.

## C1. CHAPTER 1

### GENERAL PROVISIONS

#### C1.1. PURPOSE

This Manual implements DoD Instruction 1325.7 (reference (a)) and provides procedures for computing sentences to confinement for military prisoners.

#### C1.2. GENERAL REQUIREMENTS

C1.2.1. Sentences to confinement shall be computed in accordance with the procedures provided in this Manual. This may be done through automated means, but when manually computing a sentence, the expiration table at Appendix 2 and DD Form 2710-1, Prisoner Sentence Computation (Appendix 3), shall be used. The expiration table, or its automated equivalent, formats the number 1 to January 1, 1900. January 1, 2000, formats to 36,526. This information is provided in case expiration dates exceed those in the tables at Appendix 2.

C1.2.2. Good conduct time (GCT) rates shall be consistent with the DoD policy on GCT rate of earning applicable at the time a sentence was adjudged. Because prisoners may fall under different GCT rate policies, only abbreviated examples are provided at Appendix 3 and do not reflect actual minimum release dates (MRD).

C1.2.3. Correctional facility commanders shall exercise close and continuing supervision over personnel responsible for computation of sentence expiration dates to ensure that no prisoner is held in confinement beyond the proper release date or released before that date.

#### C1.3. EFFECTIVE DATE

Provisions on sentence computation contained within this Manual shall apply to sentences adjudged on or after the effective date of this manual. Members whose sentences were adjudged before the effective date of this Manual shall be governed by the Military Service instructions in place at the time the sentences were adjudged. The particular expiration table used, if applied appropriately, has no impact on the computation of a sentence to confinement. Therefore, the expiration tables provided at Appendix 2, or their automated equivalent, may be used by the Military Services for sentences adjudged before the effective date of this Manual.

#### C1.4 INFORMATION COLLECTIONS

DD Form 2710-1, Prisoner Sentence Computation, referred to in paragraph C1.2 of this issuance, does not require licensing with an OMB Control Number in accordance with Paragraph 1 of Volume 2 of DoD Manual 8910.01.

C1.5. SUMMARY OF CHANGE 3

The change to this issuance updates information collections information and references and corrects the information in the Sentence Expiration Table for 2019.

## C2. CHAPTER 2

### SENTENCE COMPUTATION PROCEDURES

#### C2.1. GENERAL PROCEDURES

C2.1.1. Sentence computation must follow a logical order to correctly compute an adjusted maximum release date (AMXRD) and a MRD. Specific events affect the maximum release date (MXRD) while others only affect the MRD. The DD Form 2710-1, "Prisoner Sentence Computation" (Appendix 3) lists the order of computation.

C2.1.1.1. Events That Affect the MXRD: The MXRD can only be affected if there is a reduction of the sentence to confinement or if street time credit is disapproved following revocation of parole or mandatory supervised release (MSR).

C2.1.1.2. Events That Affect the AMXRD: administrative credit, judicial credit, inoperative time, and crossing the international date line (IDL).

C2.1.1.3. Events That Affect the MRD: awarding and forfeiture of GCT and earned time (ET).

C2.1.2. Computation may also involve one or more of the methods described below. In computing a span of time, it is necessary to apply the correct method.

C2.1.2.1. Day-for-day method. A method by which the span of time between two calendar dates is expressed in days. This method is primarily used for computing inoperative time. It shall also be used for determining time served or time remaining on a sentence when the sentence is expressed in days.

C2.1.2.1.1. The expiration table at Appendix 2, or its automated equivalent, shall be used when applying the day-for-day method of determining a span of time between two dates. The table, expressed in days, serves to identify the exact span of time between calendar dates. Use of the table is necessary as not all months and years have the same number of days.

C2.1.2.1.2. The expiration table provides five digit numbers that correspond to specific calendar dates. The numbers run consecutively from January 1 until December 31, and each year is located on a separate page. (Example: January 1, 1995, and December 31, 1995, correspond to numbers 34700 and 35064, respectively.) Months are shown along the top line of each page, and the days of the month are shown along the left and right edges. The number located in both the column for the month and on the line for the day of the month is the expiration table number for that date.

C2.1.2.1.3. The expiration table, or its automated equivalent, shall be used in manually computing sentence expiration dates on the DD Form 2710-1, (Appendix 3).

C2.1.2.2. Calendar method. A method by which the span of time between two calendar dates is expressed in years, months, and days. The dates must be in YYYY MM DD format. This method is used to compute: the length of a sentence when expressed in days in order to compute GCT, the length of a sentence remaining to be served in order to compute GCT on parole/mandatory supervised release (MSR) violators, the time served on a sentence, and the amount of GCT the prisoner has available for forfeiture.

C2.1.2.2.1. During subtraction, if it becomes necessary to borrow from a column, be careful to borrow the correct amount. When borrowing from the year column to add to the month column, simply subtract 1 year from the year column and add 12 months to the month column. Figure C2.F1., below, shows October 31, 2003, subtracted from January 31, 2004.

Figure C2.F1. Example of Borrowing From the Year Column to Add to the Month Column

YYYY MM DD	YYYY MM DD	YYYY MM DD
2004 01 31	2004 01 31	2003 13 31
-2003 10 31	-1 +12	-2003 10 31
	2003 13 31	0000 03 00

C2.1.2.2.2. When borrowing from the month column to add to the day column, the specific number of days for the previous month shall be used. Figure C2.F2., below, shows October 2, 2003, subtracted from December 1, 2003.

Figure C2.F2. Example of Borrowing From the Month Column to Add to the Day Column, Days in Previous Month

YYYY MM DD	YYYY MM DD	YYYY MM DD
2003 12 01	2003 12 01	2003 11 31
-2003 10 02	-1 +30	-2003 10 02
	2003 11 31	0000 01 29

Because there are 30 days in November, 30 days were added to the day column and 1 month subtracted from the month column.

Figure C2.F3., below, shows January 30, 2004, subtracted from March 25, 2004.

Figure C2.F3. Example of Borrowing From the Month Column to Add to the Day Column, Days in Previous Month

YYYY MM DD	YYYY MM DD	YYYY MM DD
2004 03 25	2004 03 25	2004 02 54
-2004 01 30	-1 +29	-2004 01 30
	2004 02 54	0000 01 24

Because there are 29 days in a leap year February, 29 days were added to the day column.

C2.1.2.2.3. When borrowing both from month column and the year column, borrow from the month column first, then from the year column. Figure C2.F4., below, shows December 15, 2003, subtracted from April 2, 2004.

Figure C2.F4. Example of Borrowing From Both the Month Column and the Year Column

YYYY MM DD	YYYY MM DD	YYYY MM DD	YYYY MM DD
2004 04 02	2004 04 02	2004 03 33	2003 15 33
-2003 12 15	-1 +31	-1 +12 00	-2003 12 15
	2004 03 33	2003 15 33	0000 03 18

Because there are 31 days in March, 31 days were added to the day column and 1 month subtracted. Then 12 months were added to the month column and 1 year was subtracted from the year column.

C2.1.2.2.4. When borrowing from the month column, it may be necessary to adjust the year column. Figure C2.F5., below, shows November 20, 2003, subtracted from January 5, 2004.

Figure C2.F5. Example of Adjusting the Year Column When Borrowing From the Month Column

YYYY MM DD	YYYY MM DD	YYYY MM DD	YYYY MM DD
2004 01 05	2004 01 05	2004 00 36	2003 12 36
2003 11 20	-1 +31	-1 +12	-2003 11 20
	2004 00 36	2003 12 36	0000 01 16

Because December is in a previous year, the year column was adjusted to reflect that year. There are 31 days in December, so 31 days were added to the day column.

C2.1.3. All sentences shall be computed from the date confinement is adjudged, even if confinement is deferred, suspended, contingent on nonpayment of a fine, or not executed because the trial was held in absentia.

C2.1.4. One day shall always be subtracted from the initial computation to give credit for the first day in confinement. The adjudged date and the day of release both count as full days of confinement for sentence computation purposes, regardless of the hour of confinement or release. Figure C2.F6., below, shows this subtraction for a 1-year sentence adjudged on September 15, 2003.

Figure C2.F6. Example of Crediting the First Day of Confinement

YYYY MM DD	YYYY MM DD
Adjudged on	2003 09 15
Sentence	+ 1 00 00
	2004 09 15
Less 1 day	- 0 00 01
	2004 09 14

C2.1.4.1. In some instances when adding the sentence length, an erroneous date is created. The date must be an actual date before the day is subtracted. Example: Figure C2.F.7., below, shows how an erroneous date is created in computing a 1-month sentence adjudged on January 31, 2003, and the correct way of proceeding.

Figure C2.F7. Example of Creating an Erroneous Date

	YYYY MM DD
Adjudged on	2003 01 31
Sentence	+ 01 00
	2003 02 31 (erroneous date)
Adjudged	2003 01 31
Sentence	+ 01 00
	2003 02 28
Less 1 day	- 0 00 01
	2003 02 27

C2.1.5. For sentences to confinement expressed in days, add the number of days in the sentence to the expiration table number corresponding to the date confinement is adjudged. Figure C2.F8., below, shows a 30-day sentence to confinement, adjudged August 23, 2003.

Figure C2.F8. Example of Computing a Sentence Expressed in Days

	YYYY MM DD	Expiration Table
Adjudged on	2003 08 23	37856
Sentence	+ 30	+30
		37886
Less 1 day		-1
	2003 09 21	37885

C2.1.6. For sentences to confinement expressed in months, convert the months to years and months. Add the number of years and months to the year/month/day adjudged. Figure C2.F9., below, shows a 13-month sentence to confinement, adjudged August 23, 2003.

First divide 13 by 12 to get 1 whole year. The remainder is 1 month. The sentence length is 1 year and 1 month.

Figure C2.F9. Example of Computing a Sentence Expressed in Months

	YYYY MM DD	Expiration Table
Adjudged on	2003 08 23	
Sentence	+ 01 01	
	2004 09 23	38253
Less 1 day		-1
	2004 09 22	38252

C2.1.7. For sentences to confinement expressed in years, add the number of years to the year/month/day adjudged date. Figure C2.F10., below, shows a 1-year sentence to confinement, adjudged August 23, 2003.

Figure C2.F10. Example of Computing a Sentence Expressed in Years

	YYYY MM DD	Expiration Table
Adjudged on	2003 08 23	
Sentence	+ 01	
	2004 08 23	38222
Less 1 day		-1
	2004 08 22	38221

C2.1.8. In rare instances, a member may be sentenced to a mixture of years, months, and days. If this occurs, add the years and months to the date the sentence was adjudged then add the days using the expiration table. Figure C2.F11., below, shows a, 1-year, 1-month, and 15-day sentence to confinement, adjudged August 23, 2003.

Figure C2.F11. Example of Computing a Sentence Expressed in a Mixture of Years, Months, and Days

	YYYY MM DD	Expiration Table
Adjudged on	2003 08 23	
Sentence	+ 01 01	
	2004 09 23	38253
		+15
		38268
Less 1 day		-1
	2004 10 07	38267

C2.1.9. An adjudged sentence to confinement runs continuously until completion, and prisoners shall be given credit for time served, except when the term of confinement is interrupted by inoperative time.

C2.1.10. Prisoners shall be released on the actual MRD, or MXRD if on MSR, regardless of non-duty days and holidays.

C2.1.11. GCT and ET rates, policies, and procedures are provided in either reference (a) or superseding policy.

## C2.2. CREDIT FOR PRETRIAL AGREEMENTS (PTA)

C2.2.1. Even if the Report of Results of Trial (RROT) includes the terms of a PTA, the sentence as announced by the court is still the initial basis for computing GCT. After sentence approval, GCT shall be computed based on the sentence the CA approves and only from the date of the approval. If the approved sentence is less than the announced sentence and the amount of GCT is reduced, credits and GCT earned before the CA's action shall be kept by the prisoner.

C2.2.2. The CA is responsible for notifying the correctional facility of any change to the status of the PTA affecting length of confinement. If the CA does not act on the sentence before the projected release date based on the PTA, the correctional facility shall contact the CA and request guidance. If CA authorization is received, the prisoner shall be released per the PTA using GCT earned, based on the sentence announced by the court.

## C2.3. CROSSING THE IDL

Inequities in actual confinement served or in the actual release date may occur when prisoners are confined outside the Continental United States or are being transferred to Continental United States facilities and they cross the IDL. The following modification shall be made to compute the actual release date under these conditions:

C2.3.1. Crossing East to West: Add 1 day to the original computation.

C2.3.2. Crossing West to East: Subtract 1 day from the original computation.

## C2.4. ADMINISTRATIVE AND JUDICIAL CREDIT

C2.4.1. The RROT shall constitute the official notice of administrative and judicial credit. Correctional facility commanders shall ensure that each prisoner promptly receives the credit shown in the report. There is no requirement to wait for the post-trial action of the CA or other reviewing authorities. Where disparity exists or clarity is needed, correctional facility commanders shall coordinate with the Convening Authority's Staff Judge Advocate for resolution.

Figure C2.F12., below, shows a 1-year sentence adjudged on September 15, 2003. The RROT shows that the Service member was in pretrial confinement for 15 days.

Figure C2.F12. Example of Crediting Pretrial Confinement

	YYYY MM DD	Expiration Table
Adjudged on	2003 09 15	
Sentence	+ 1 00 00	
	2004 09 15	
Less 1 day	- 1	
MXRD	2004 09 14	38244
Pretrial credit		-15
AMXRD	2004 08 30	38229

C2.4.2. Each prisoner shall receive all sentence credit directed by the military judge, as shown in the RROT. The judge will direct credit for each day spent in pretrial confinement or under restriction tantamount to confinement for crimes for which the prisoner was later convicted. Figure C2.F13., below, shows a 1-year sentence adjudged on September 15, 2003, with the RROT showing that the Service member was in pretrial confinement for 15 days and was restricted to the barracks for 30 days. The judge rules that the 30 days of restriction were tantamount to confinement and orders credit for this time towards the sentence.

Figure C2.F13. Example of Crediting Restriction Tantamount to Confinement

	YYYY MM DD	Expiration Table
Adjudged on	2003 09 15	
Sentence	+ 1 00 00	
	2004 09 15	
Less 1 day	- 1	
MXRD	2004 09 14	38244
Pretrial credit		-15
	2004 08 30	38229
Judicial credit		-30
AMXRD	2004 07 31	38199

C2.4.3. Additional credit ordered by the CA or other reviewing authorities in their post-trial actions shall also be included in the computation of the sentence. Be careful to ensure that this credit is truly additional and not a reiteration of administrative or judicial credit already given.

## C2.5. INOPERATIVE TIME

C2.5.1. Inoperative time includes the time encompassed by deferment of confinement, escape, erroneous release from confinement through fraud, suspension of confinement, parole or MSR if revoked and street time credit is denied, absence after delivery to civil authorities if followed by a conviction in a civilian court, and interruption of the sentence for service of another sentence to confinement. The prisoner shall receive full credit for any day or portion of a day spent in confinement regardless of the hour of confinement or release.

C2.5.2. Deferment Before Confinement. If a sentence to confinement is legally deferred, the date of deferment to the date that the deferment ends shall be considered inoperative time. If the prisoner is confined for any portion of the deferment date, that day is considered a day of confinement. Figure C2.F14., below, shows a case where the CA defers a sentence to confinement: A sentence to confinement for 30 days is adjudged on August 24, 2003. The prisoner requests a deferment of confinement until August 26, 2003, and is granted the request by the CA. The prisoner reports to confinement on August 26, 2003.

Figure C2.F14. Example of Inoperative Time Caused by Deferment Before Confinement

	YYYY MM DD	Expiration Table
Adjudged on	2003 08 24	37857

AMXRD	2003 09 24	37888

C2.5.3. Deferment While in Confinement or Under Parole or MSR. If a deferment is approved while a sentence to confinement or period of parole or MSR is running, inoperative time begins on the day after the release from confinement or from parole or MSR supervision and ends on the day before the return to confinement or resumption of supervision. Figure C2.F15., below, shows a case where the CA defers a sentence to confinement while it is running. A sentence to confinement for 30 days is adjudged on August 24, 2003. The prisoner requests a deferment of confinement for 5 days. The CA grants the request effective August 25, 2003. The prisoner is released from confinement on August 25, 2003, and reports back to confinement on August 30, 2003.

Inop time				+ 4
AMXRD	2003	09	26	37890

C2.5.4. Escape. A period of inoperative time ends and the sentence is resumed on the day the prisoner returns to military control (RMC), even if charges are pending on the escape offense. Inoperative time is computed by subtracting the date the sentence was interrupted from the date of RMC. The date the sentence was interrupted is the first full 24-hour day the prisoner was not serving the sentence to confinement. Figure C2.F16., below, shows inoperative time when a prisoner with a 4-year sentence adjudged on July 15, 2003, escapes from confinement on August 23, 2003 and is apprehended by civil authorities (i.e., RMC) on August 25, 2003.

C2.5.5. Escaped prisoners who RMC, but who conceal their status as prisoners, continue to be absent without authority until returned to confinement. Figure C2.F17., below, shows a case where a prisoner with a 5-year sentence to confinement adjudged on December 18, 2006, escapes from confinement on June 13, 2007, and is apprehended on unrelated charges on July 25, 2007. On July 26, 2007, the authorities discover the prisoner's escaped status through a routine warrant check. For sentence computation purposes, the prisoner is RMC on July 26, 2007.

C2.5.6. Vacation of a Suspended Sentence when Prisoner has been Released. If a prisoner is released but still under a suspended sentence to confinement and the suspension is later vacated, the period from the day after release from confinement to the day before return to confinement shall be considered as inoperative time. The date the sentence was adjudged remains the start date for confinement. Figure C2.F18., below, shows inoperative time in a case where the CA vacates a suspension. A prisoner receives a sentence to confinement for 60 days, with 30 days suspended for 6 months. The prisoner completes his 30-day sentence (5 days GCT credited) and is released on September 17, 2003. On September 28, 2003, the CA vacates the suspension and the prisoner returns to confinement to complete the sentence.

C2.5.7. If a portion of a sentence to confinement is suspended and the prisoner is serving the unsuspended portion of the sentence when the suspended portion is vacated, the sentence shall be recomputed based on the revised sentence length. There is no inoperative time. The date the sentence was adjudged remains the start date for confinement.

C2.5.8. When a prisoner’s parole status or MSR status is suspended pending a revocation hearing, the prisoner shall be conditionally charged inoperative time from the date following release to the RMC date. Figure C2.F19., below, shows a case where a 10-year sentence is adjudged on August 24, 2003. The prisoner is released on November 27, 2007, and is RMC on May 30, 2008. The Clemency and Parole Board concerned has not reviewed the case.

C2.5.9. Inoperative time also includes periods of time for which the Clemency and Parole Board concerned does not allow street time credit upon revocation of parole or MSR. The letter of revocation from the Clemency and Parole Board shall show how much street time credit, if any, is awarded. Figure C2.F20., below, shows a case where a 10-year sentence is adjudged on August 24, 2003. The prisoner is released on November 27, 2007, and is RMC on May 30, 2008. The Clemency and Parole Board awarded credit for service on the sentence while the prisoner was on parole from the date of release to, but not including, April 30, 2008.

C2.5.11. A prisoner whose court-martial sentence to confinement is interrupted to begin serving an additional sentence to confinement shall be charged with inoperative time on the original sentence, once the additional sentence has been adjudged. Figure C2.F22., below, shows a case where a sentence to confinement for 5 years is adjudged on July 15, 2002. On April 30, 2003, an additional sentence of confinement for 1 year is adjudged. Through GCT and ET, the prisoner's MRD on the additional sentence is February 18, 2004.

## C2.6. CONTINGENT CONFINEMENT

Prisoners who receive a sentence to confinement contingent on conditions determined at a court-martial shall serve the contingent confinement, if ordered by proper authority after due process. The contingent confinement shall be added to the original sentence, and GCT to be earned for the period after the contingent sentence is ordered to be served shall be recomputed based on the new sentence length. No additional GCT shall be awarded for the time served prior to this order.

## C2.7. MULTIPLE SENTENCES

C2.7.1. A sentence to confinement adjudged by a court-martial shall not be served concurrently with any other sentence to confinement adjudged by a court-martial or a civil court.

C2.7.2. When a prisoner serving a sentence adjudged by a court-martial is later convicted of another offense and sentenced to another term of confinement, the later sentence to confinement shall be carried out as of the date adjudged and shall interrupt the running of the prior sentence. The remaining portion of the prior sentence to confinement shall be served after the later sentence has been fully served (Manual for Courts-Martial (reference (b))).

C2.7.3. In cases where a prisoner is serving two or more sentences to confinement, the sentences shall not be added together when computing GCT.

## C2.8. REHEARING AND RETRIAL

C2.8.1. Confinement adjudged at a rehearing or retrial shall be computed in the following manner:

C2.8.1.1. Computation shall begin with the date the new confinement is adjudged.

C2.8.1.2. All credits associated with the original sentence, noted in the new RROT, shall be included in the computation. This includes original pretrial confinement, judicial credits, and time served on the original sentence.

C2.8.1.3. Confinement served awaiting the rehearing or retrial shall be credited as time served on the new sentence.

C2.8.1.4. Any additional credits ordered by the court, not already applied, shall be included in the computation.

C2.8.1.5. GCT shall be based on the new sentence to confinement.

Figure C2.F24., below, shows a case where a sentence to confinement for eight years is adjudged on April 10, 2003, and the prisoner receives 30 days of pretrial confinement credit. An appeals court overturns the sentence and orders a rehearing on September 1, 2005. The prisoner is released from confinement on October 2, 2005. The rehearing is completed and a new sentence to confinement for 6 years is adjudged on November 11, 2005.

Confinement credit				907

C2.8.2. Provisions on sentence computation in this Manual apply to sentences adjudged on or after July 27, 2004. Prisoners who were originally sentenced before that date had their sentences computed under Military Service regulations, rather than according to this Manual. Any prisoner sentenced before July 27, 2004, whose conviction or sentence is set aside on or after July 27, 2004, shall be credited with GCT and ET according to the Military Service regulations in effect at the time of the original sentencing, including after any retrial or rehearing on sentence. Confinement served awaiting any retrial or rehearing shall be credited as time served on the new sentence.

## C2.9. COMPUTING GCT

C2.9.1. When computing GCT, use the sentence length and apply the following formula:

$$\begin{aligned} &(\text{number of years} \times 12) + (\text{number of months}) = \text{total months} \\ &(\text{total months} \times \text{GCT rate}) + \text{partial month credit} = \text{GCT for the sentence.} \end{aligned}$$

C2.9.2. For sentences expressed in days, the calendar method shall be used to convert the sentence length to years, months, and days. Then apply the above formula.

C2.9.2.1. When sentences expressed in days are less than 31 days, the rate of GCT earning for partial months table in Appendix 4 shall be used.

C2.9.2.2. When sentences expressed in days are 31 days or greater, they should be converted as shown in Figure C2.F25., below, a case where a sentence to confinement for 40 days is adjudged on January 6, 2004.

Figure C2.F25. Example of Converting a Sentence Expressed in Days for the Purpose of Computing GCT

Adjudged on	-2004 01 06
	1 9

**C2.10. UNEXPIRED SENTENCE TO BE SERVED BY PAROLE AND MSR VIOLATORS**

In all cases in which a parole or MSR violator returns to confinement, the date the sentence was adjudged remains the confinement start date. Prisoners do not receive GCT credit for time in confinement before being released on parole or MSR. For the purpose of computing GCT on the unexpired term of the sentence to be served by a person who has violated parole or MSR and returned to military confinement, the unexpired term shall be the actual number of years, months, and days difference between the RMC date and the AMXRD, plus 1 day to include the day of release. The calendar method shall be used to compute this term. Figure C2.F26., below, shows a case where a 10-year sentence is adjudged on August 24, 2003, and the prisoner is released on November 27, 2007. The member is RMC on May 30, 2008.

Figure C2.F26. Example of Computing Unexpired Term to be Served by Parole and MSR Violators Returned to Confinement

	YYYY MM DD	Expiration Table
Adjudged on Sentence	2003 08 24	
	+ 10

Less 1-day MXRD	- 1	
	2013 08 23	41509
RMC Sentence interrupted Inop time	2008 05 30	39598
	2007 11 28	-39414
		184
MXRD Inop time	2013 08 23	41509
		+ 184
AMXRD	2014 02 23	41693

```

YYYY MM DD  YYYY MM DD  YYYY MM DD  YYYY MM DD  YYYY MM DD
2014 02 24  2014 02 24  2014 01 55  2014 01 55  2013 13 55
-2008 05 30      -1 +31  -2008 05 30  -1 +12      -2008 05 30
                2014 01 55                2013 13 55      5 08 25
    
```

Because there are 31 days in January, 31 days were added to the day column and 1 month was subtracted. Then 12 months were added to the month column and 1 year subtracted from the year column. For GCT purposes, the sentence remaining is 5 years, 8 months, and 25 days.

C2.11. COMPUTING GCT AVAILABLE FOR FORFEITURE

C2.11.1. If a prisoner is serving two or more sentences to confinement, the sentences shall not be added together for the purpose of computing GCT, but shall be added together to determine the date of eligibility for parole and restoration to duty.

C2.11.2. Correctional facility commanders may direct forfeiture of GCT and ET in accordance with reference (a).

C2.11.3. When computing the amount of GCT available for forfeiture, include all available GCT up to and including the date of the violation. Figure C2.F27., below, shows a case where a 10-year sentence is adjudged on August 25, 2003, and the prisoner remains in confinement continuously from that date. The prisoner did not have any additional credits toward confinement. On June 29, 2006, the prisoner violates institutional rules and is scheduled to appear before a disciplinary board. One day shall be added to the offense date to account for that day (calendar method).

Figure C2.F27. Example of Computing GCT Available for Forfeiture

YYYY MM DD	YYYY MM DD	YYYY MM DD
2006 06 30	2006 06 30	2005 18 30
-2003 08 25	-1 +12	-2003 08 25
	2005 18 30	2 10 05 x Rate

C2.11.4. Once time served has been determined, compute the actual GCT based on the formula in paragraph C2.9.1.

C2.11.5. GCT for time served must be adjusted for any previous forfeitures/restorations.

## C2.12. ARTICLE 15, UCMJ, CONFINEMENT

C2.12.1. Confinement on bread and water (B&W) or diminished rations (DIMRATS) is an authorized punishment under Article 15, Uniform Code of Military Justice (UCMJ) (reference (c)). This punishment is authorized for up to 3 days and can only be imposed upon enlisted personnel who are attached to or embarked on a vessel and serving in pay grades specified by the Secretaries of the Military Departments.

C2.12.2. For sentence computation purposes, confinement on B&W or DIMRATS normally begins on the date the confinement is imposed, but when circumstances require or when adequate facilities are not available, or if the member is found to be not medically fit for this confinement, a commanding officer may defer execution of confinement on B&W or DIMRATS for a reasonable period of time, not to exceed 15 days, in which case the beginning date of the sentence is the termination date of the deferment. One of these dates shall be used as the beginning date for sentence computation purposes and shall count as a full day of confinement regardless of the time of confinement or whether or not the person is placed in confinement on that date.

C2.12.3. GCT credit may not be earned for punishments imposed under Article 15, UCMJ.

C2.12.4. Computing the release date by the number of hours or meals served in confinement is not authorized.

## C2.13. REDUCTION OR REMISSION OF SENTENCES TO CONFINEMENT

Under proper authority, a sentence to confinement may be reduced or remitted.

C2.13.1. A reduction of a sentence to confinement reduces the length of the sentence the prisoner is currently serving. The MRD shall be recomputed based on the new sentence length. The prisoner shall still receive administrative and judicial credits associated with the original sentence and any GCT or ET actually earned before the sentence reduction. Any inoperative time and forfeitures associated with the original sentence shall also be included when recomputing the MRD.

C2.13.2. A remission of a sentence to confinement ends the confinement on a specific date. The sentence shall not be recomputed, and no additional credits shall be given to make the release date earlier than specified. If, however, the original computation, with credits, results in a release date before the remitted date, the original computation shall apply.

AP1. APPENDIX 1

DEFINITIONS

AP1.1.1. Adjusted Maximum Release Date (AMXRD). The AMXRD is computed by taking the Maximum Release Date (MXRD) and adjusting it for administrative credit, judicial credit, inoperative time, and the adjustment for crossing the international date line.

AP1.1.2. Administrative Credit. Day-for-day credit provided on the Report of Results of Trial for pre-trial confinement and conditions tantamount to confinement.

AP1.1.3. Calendar Method. A method by which the span of time between two calendar dates is expressed in years, months, and days. For example, the span of time between April 4, 2001, and August 11, 2001, (inclusive of each of those dates) is 4 months and 8 days. The span of time between February 2, 2001, and March 1, 2001, (inclusive of each of those dates) is 1 month.

AP1.1.4. Confinement. Confinement is the physical restraint of a person imposed by order of competent authority, either pending disposition of charges (pretrial) or because of a sentence adjudged by a court-martial. Although not involving physical restraint, a sentence to confinement may also be served in a parole or mandatory supervised release (MSR) status.

AP1.1.5. Confinement as Nonjudicial Punishment. The physical restraint of a person attached to or embarked in a vessel, imposed by order of competent authority under (reference (b)) (e.g., confinement to B&W and/or DIMRATS).

AP1.1.6. Day-for-Day Method. A method by which the span of time between two dates is solely expressed in days. For example, the span of time between February 2, 2001, and March 1, 2001, (inclusive of each of those dates) is 28 days.

AP1.1.7. Deferment. Postponement of the running of the sentence (R.C.M. 1101(c)) (reference (b)).

AP1.1.8. Earned Time. Deductions from a prisoner's release date earned for participation and graded effort in the areas of work, offense-related programs, education, self-improvement and personal growth, or other support activity specifically authorized by the correctional facility commander in accordance with Military Service policy.

AP1.1.9. Good Conduct Time. A deduction from the AMXRD for faithful observance of all rules and regulations.

AP1.1.10. Inoperative Time. Any period of time during which prisoners are not credited with serving their sentence to confinement.

AP1.1.11. Judicial Credit. Credit ordered by judicial authority to be applied to a sentence to confinement.

AP1.1.12. Mandatory Supervised Release (MSR) (Supervised Release). A form of conditional release granted to individuals who have served their sentence to confinement up to their minimum release date (MRD). This form of release is served until the AMXRD unless otherwise revoked or remitted by the Clemency and Parole Board concerned.

AP1.1.13. Maximum Release Date (MXRD). The sentence or sentences to confinement without reductions, but less 1 day for the day of confinement/release. For multiple sentences, each sentence has a specific MXRD.

AP1.1.14. Minimum Release Date (MRD). AMXRD adjusted for credit or forfeiture of GCT and abatements.

AP1.1.15. Parole. A form of conditional release from confinement when a prisoner is under the guidance and supervision of a U.S. probation officer.

AP1.1.16. Parole Violator Term. Unexpired term of the sentence to be served by a parole violator.

AP1.1.17. Prisoner (Inmate). A person sentenced by a court-martial to confinement or death and ordered into confinement by competent authority, whether or not the sentence has been approved by the convening authority. A person placed into confinement by competent authority pending trial by court-martial is a pre-trial prisoner.

AP1.1.18. Reduction of Sentence to Confinement. A reduction of a sentence to confinement reduces the length of the sentence the prisoner is to serve.

AP1.1.19. Remission of Sentence to Confinement. A remission of a sentence cancels the unexecuted part of the sentence to which it applies (i.e., the sentence is remitted).

AP1.1.20. Return to Military Control. The date and hour a military member (e.g., prisoner, absentee, or deserter) surrenders to, is delivered to, or is apprehended by or for military authorities; or a civilian authority holding the military member for some reason other than at the request of the military informs the military of his or her availability; or a military member otherwise comes under the control of military personnel.

AP1.1.21. Span of Time. The period of time between two specific dates expressed in days (day-for-day method), or years/months/days (calendar method).

AP1.1.22. Street Time Credit. Credit for time served against a sentence to confinement while on parole or MSR determined by the Clemency and Parole Board concerned.

AP1.1.23. Suspension of Sentence. Period during which the suspended part of an approved sentence is not executed (R.C.M. 1108(a)) (reference (b)).

AP1.1.24. Time Served. The span of time a prisoner has served on a sentence to confinement. This includes all administrative and judicial credits associated with the sentence, adjusted if necessary for inoperative time.

AP1.1.25. Unadjusted Maximum Release Date (UMXRD). The MXRD without the less 1-day adjustment. The UMXRD is used for translating sentences expressed in days that are 31 days or greater to the precise span of time (in years, months and days).

AP1.1.26. Vacated Suspension. The unexpired term of the sentence to be served by persons who have violated the conditions of their suspension and have had the suspension vacated.

AP2. APPENDIX 2

AP2.T1. SENTENCE EXPIRATION TABLE

JANUARY 1, 1952 - DECEMBER 31, 2079

## 1952

Day	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Day

AP3. APPENDIX 3

SENTENCE COMPUTATION EXAMPLES

AP3.1. SENTENCES IN DAYS.

AP3.1.1. A sentence to confinement for 15 days is adjudged on 20040401. Figure AP3.F1.1. applies.

AP3.1.2. A sentence to confinement for 30 days is adjudged on 20040401. Figure AP3F.1.2. applies.

AP3.1.3. A sentence to confinement for 75 days is adjudged on 20040401 (converts to 2 months and 14 days for good conduct time (GCT) purposes). Figure AP3.F1.3. applies.

AP3.1.4. A sentence to confinement for 365 days is adjudged on 20040401 (converts to 1 year for GCT purposes). Figure AP3.F1.4. applies.

AP3.1.5. A sentence to confinement for 400 days is adjudged on 20040401 (converts to 1 year, 1 month, and 5 days for GCT purposes). Figure AP3.F1.5. applies.

AP3.2. SENTENCES IN MONTHS.

AP3.2.1. A sentence to confinement for 1 month is adjudged on 20050301. Figure AP3.F2.1. applies.

AP3.2.2. A sentence to confinement for 1 month is adjudged on 20040131 (leap year computation). Figure AP3.F2.2. applies.

AP3.2.3. A sentence to confinement for 13 months is adjudged on 20050131 (converts to 1 year and 1 month). Figure AP3.F2.3. applies.

AP3.3. SENTENCES IN YEARS.

AP3.3.1. A sentence to confinement for 1 year is adjudged on 20050301. Figure AP3.F3.1. applies.

AP3.3.2. A sentence to confinement for 22 years is adjudged on 20040131. Figure AP3.F3.2. applies.

AP3.3.3. A sentence to confinement for 99 years is adjudged on 20050301. Figure AP3.F3.3. applies.

AP3.4. MIXED SENTENCES.

AP3.4.1. A sentence to confinement for 1 year and 75 days is adjudged on 20060704

(converts to 1 year, 2 months, and 13 days). Figure AP3.F4.1 applies.

AP3.4.2. A sentence to confinement for 8 months and 12 days is adjudged on 20060704. Figure AP3.F4.2 applies.

AP3.5. SENTENCES WITH INOPERATIVE TIME (DAY-FOR-DAY-METHOD).

AP3.5.1. Escape. A sentence to confinement for 5 years is adjudged on 20061218. The prisoner escapes from confinement on 20070613 and is returned to military control (RMC) on 20070818. Figure AP3.F5.1 applies.

AP3.5.2. Escape with RMC the next day. A sentence to confinement for 5 years is adjudged on 20061218. The prisoner escapes from confinement on 20070613 and is RMC on 20070614. Figure AP3.F5.2 applies.

AP3.5.3. Deferment. A sentence to confinement for 30 days is adjudged on 20040512. The member immediately (i.e., before confinement) requests deferment on 20040512, and the convening authority (CA) approves the deferment on 20040512 until 20040515. The member enters confinement on 20040515. Figure AP3.F5.3 applies.

AP3.5.4. Vacated suspension. A sentence to confinement for 1 year is adjudged on 20070318. The provisions of a PTA suspend all confinement in excess of 3 months for a period of 12 months from the date of trial. The prisoner is released from confinement on 20070602. The CA vacates the suspension on 20070815, and the member returns to confinement on 20070815. Figure AP3.F5.4 applies.

AP3.6. ADMINISTRATIVE AND JUDICIAL CREDITS.

AP3.6.1. A sentence to confinement for 3 months is adjudged on 20040815. The Report of Results of Trial (RROT) shows 5 days administrative credit. Figure AP3.F6.1. applies.

AP3.6.2. A sentence to confinement for 18 months is adjudged on 20040815. The RROT shows 5 days judicial credit. Figure AP3.F6.2. applies.

AP3.7. MULTIPLE SENTENCES.

AP3.7.1. A sentence to confinement for 18 months is adjudged on 20041114. While confined on the original sentence, the prisoner receives an additional sentence of 30 days, adjudged on 20050227. Figure AP3.F7.1 applies.

AP3.7.2. A sentence to confinement for 18 months is adjudged on 20041114. While confined on the original sentence, the prisoner receives an additional sentence of 6 months, adjudged on 20050227. Figure AP3.F7.2 applies.

AP3.8. PRETRIAL AGREEMENTS (PTAs).

AP3.8.1. A sentence to confinement for 1 year is adjudged on 20070318. In accordance with the PTA, all confinement in excess of 3 months is suspended for a period of 12 months from the date of trial. Figure AP3.F8.1. applies.

AP3.8.2. A sentence to confinement for 5 years is adjudged on 20070318. In accordance with the PTA, all confinement in excess of 3 years is suspended for a period of 36 months from the date of trial. Figure AP3.F8.2. applies.
